CAMPYLOBACTER RAPID TEST

FOR THE QUALITATIVE DETECTION OF CAMPYLOBACTER ANTIGEN

Campylobacter enteritis is a food- and waterborne zoonotic illness and one of the most common causes of infectious diarrhea in the United States. While identification of the etiological agent does not typically affect treatment outcomes, as the majority of these infections are self-limited, laboratory diagnosis is essential for epidemiological studies and outbreak tracking through strain identification and typing. Conventional laboratory diagnosis of campylobacteriosis is based on the recovery of the organism from stool specimens by microaerophilic culture.

Ordering Information

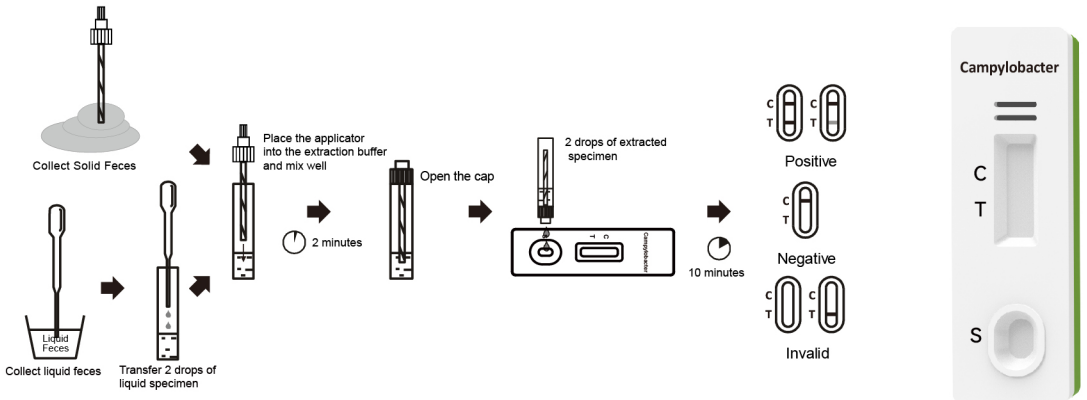

Cat. No.: SIC-RDT-CB-202063
Product: *Campylobacter* Rapid Test
Specimen: Feces
Format: Cassette
Kit Size: 10 T

Product Advantages

- ✓ Fast results in **10** minutes
- ✓ Easy visually interpretation
- ✓ Convenient Procedure
- ✓ High Accuracy

(Sensitivity: 95.2%, Specificity: 93.5%, Accuracy: 94.2%)

Convenient Procedure

Sicuro Bioengineering Ltd.
