CHAGAS RAPID TEST

EARLY SCREENING FOR A DISEASE THAT SHOWS NO SYMPTOMS

Chagas disease is an insect-borne, zoonotic infection by the protozoan T. cruzi, which causes a systemic infection of humans with acute manifestations and long term sequelae. It is estimated that 16-18 million individuals are infected worldwide, and roughly 50,000 people die each year from chronic Chagas disease (World Health Organization).

Buffy coat examination and xenodiagnosis used to be the most commonly methods in the diagnosis of acute T. cruzi infection. However, both methods are either time consuming or lack of sensitivity. Recently, serological test becomes the mainstay in the diagnosis of Chagas's disease. In particularly, recombinant antigen based tests eliminate false-positive reactions which are commonly seen in the native antigen tests.

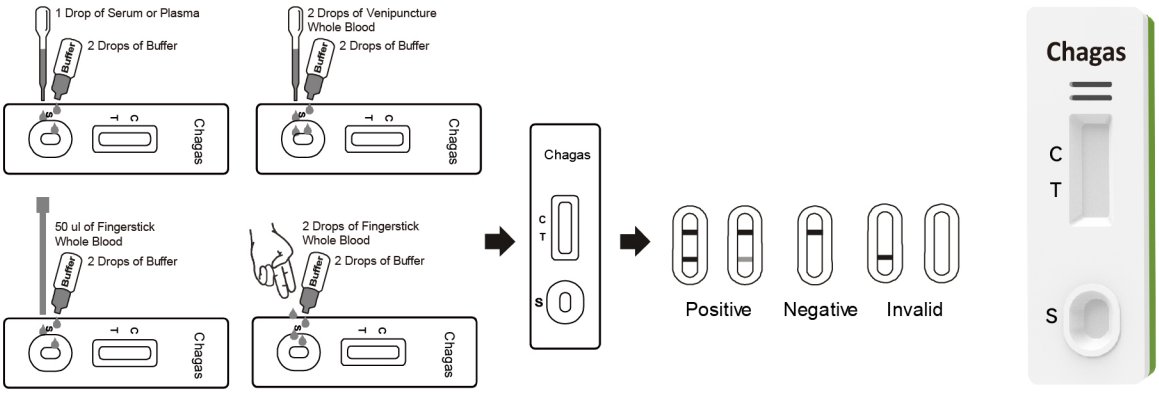

Ordering Information

Cat. No.: SIC-RDT-CHG-202072
Product: Chagas Rapid Test
Specimen: WB/S/P
Format: Cassette
Kit Size: 25 T

Product Advantages

- ✓ Fast results in **15** minutes
- ✓ Easy visually interpretation
- ✓ High accuracy

Convenient Procedure

Sicuro Bioengineering Ltd.
Address: 19 East West Road, Port Harcourt - Nigeria
Email: info@sicurobio.com
Website: www.sicurobio.com
