CHLAMYDIA RAPID TEST

AID IN THE DIAGNOSIS OF CHLAMYDIA INFECTION

Chlamydia trachomatis is the most common cause of sexually transmitted venereal infection in the world. It is composed of elementary bodies (the infectious form) and reticulate or inclusion bodies (the replicating form).

Chlamydia trachomatis has both a high prevalence and asymptomatic carriage rate, with frequent serious complications in both women and neonates. Complications of Chlamydia infection in women include cervicitis, urethritis, endometritis, pelvic inflammatory disease (PID) and increased incidence of ectopic pregnancy and infertility.

Vertical transmission of the disease during parturition from to neonate can result in inclusion conjunctivitis or pneumonia. In men, complication of Chlamydia includes urethritis and epididymitis. At least 40% of the nongonococcal urethritis cases are associated with Chlamydia infection. Approximately 70% of women with endocervical infections and up to 50% of men with urethral infections are asymptomatic.

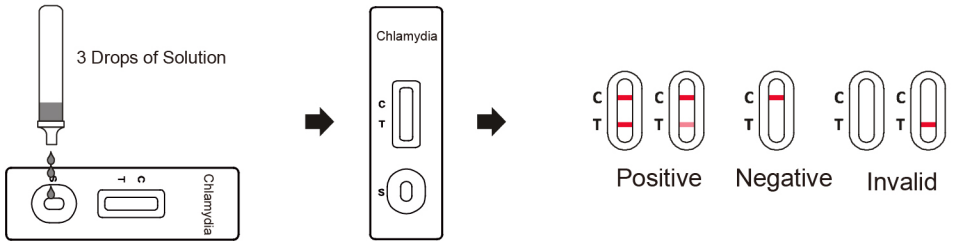

Ordering Information

Cat. No.: SIC-RDT-CHA-202040
Product: Chlamydia Rapid Test
Specimen: Swab/Urine
Format: Cassette
Kit Size: 25 T

Product Advantages

- Can be performed using female cervical swab, male urethral swab or male urine specimens
- Vigorous and thorough collection technique that provides cellular material
- Read the result at 10 minutes

Convenient Procedure

Sicuro Bioengineering Ltd.
Address: 19 East West Road, Port Harcourt - Nigeria
Email: info@sicurobio.com
Website: www.sicurobio.com
