GIARDIA LAMBLIA RAPID TEST

SWIFT DIAGNOSIS, CONFIDENT RESULTS

Giardia Lamblia is the most common protozoa known to be responsible for one of the main causes of severe diarrhea in humans, particularly in immunocompromized people. Epidemiological studies, in 1991, showed that infections with Giardia increased in the United States with a prevalence of around 6% on 178,000 samples. The diagnosis of G. lamblia is carried out under microscopy after flotation on zinc sulphate or by direct or indirect immunofluorescence, on non-concentrated samples displayed on a slide. The rapid test can detect Giardia Lamblia in fecal specimens within 10 minutes.

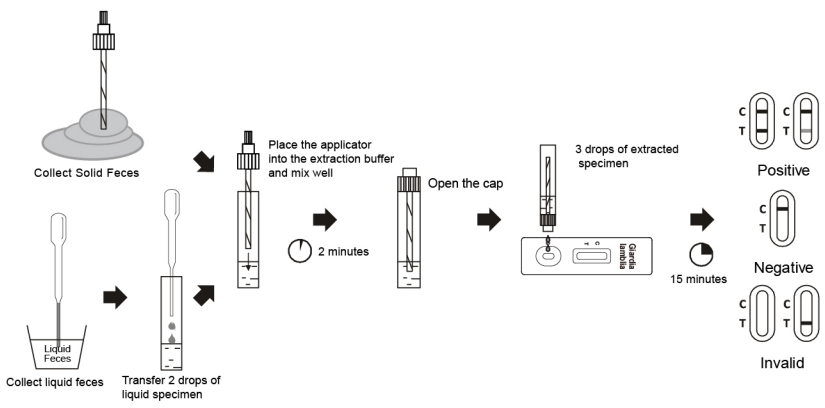

Ordering Information

Cat. No.: SIC-RDT-GL-202061
Product: *Giardia Lamblia* Rapid Test
Specimen: Feces
Format: Cassette
Kit Size: 10 T

Product Advantages

- ✓ Fast results in **10** minutes
- ✓ Easy visually interpretation
- ✓ High accuracy (97.1%)

Convenient Procedure

Sicuro Bioengineering Ltd.
Address: 19 East West Road, Port Harcourt - Nigeria
