

GONORRHEA RAPID TEST

EARLY DETECTION TO PROTECT REPRODUCTIVE HEALTH

Gonorrhea is a sexually transmitted disease caused by the bacterium *Neisseria gonorrhoeae*. Gonorrhea is one of the most common infectious bacterial diseases and is most frequently transmitted during sexual intercourse, including vaginal, oral and anal sex. The causative organism can infect the throat, producing a severe sore throat. With females, it can infect the vagina, causing irritation with drainage (vaginitis). The average incubation for Gonorrhea is approximately 2 to 5 days following sexual contact with an infected partner. However, symptoms may appear as late as 2 weeks. A preliminary diagnosis of Gonorrhea can be made at the time of examination.

Ordering Information

Cat. No.: SIC-RDT-NGH-202041

Product: Gonorrhea Rapid Test

Specimen: Swab

Format: Cassette

Kit Size: 25 T

Product Advantages

- ✓ Fast results in **10** minutes
- ✓ Easy visual interpretation
- ✓ High accuracy

Convenient Procedure
