OVULATION (LH) RAPID TEST

ACCURATELY TRACK YOUR LH LEVELS

Ovulation is the release of an egg from the ovary. The egg then passes into the fallopian tube where it is ready to be fertilized. In order for pregnancy to occur, the egg must be fertilized by sperm within 24 hours after its release. Immediately prior to ovulation, the body produces a large amount of luteinizing hormone (LH) which triggers the release of a ripened egg from the ovary. This “LH surge” usually takes place in the middle of the menstrual cycle.
The Ovulation (LH) Rapid Test is a complete system to help predict the time of ovulation, and peak fertility. It is during this fertile time that pregnancy is most likely to occur.

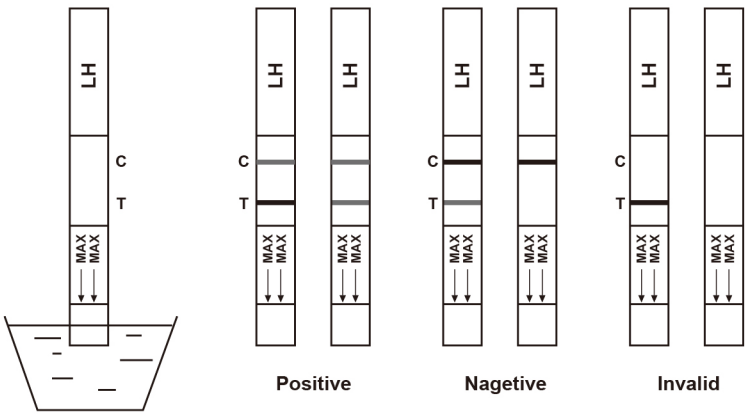

Ordering Information

Cat. No.: SIC-RDT-LH-202084
Product: Ovulation (LH) Rapid Test
Specimen: Urine
Format: Dipstick
Kit Size: 50 T

Product Advantages

- ✓ Fast results in **5** minutes
- ✓ Easy visual interpretation
- ✓ High accuracy

Convenient Procedure

Sicuro Bioengineering Ltd.
Address: 19 East West Road, Port Harcourt - Nigeria
