PSA RAPID TEST

MONITOR PROSTATE HEALTH STATUS QUICKLY AND EFFICIENTLY

Prostate specific antigen (PSA) has been detected in various tissues of the male urogenital system but only prostate glandular and endothelial cells secrete it. A PSA level of 3 to 10 ng/mL is considered to be in the “gray-zone” and levels above 10 ng/mL are highly indicative of cancer. Patients with PSA values between 3-10 ng/mL should undergo further analysis of the prostate by biopsy.
The prostate specific antigen test is the most valuable tool available for the diagnosis of early prostate cancer. Many studies have confirmed that the presence of PSA is the most useful and meaningful tumor marker known for prostate cancer and prostate infection of Benign Prostatic Hyperplasia (BPH).

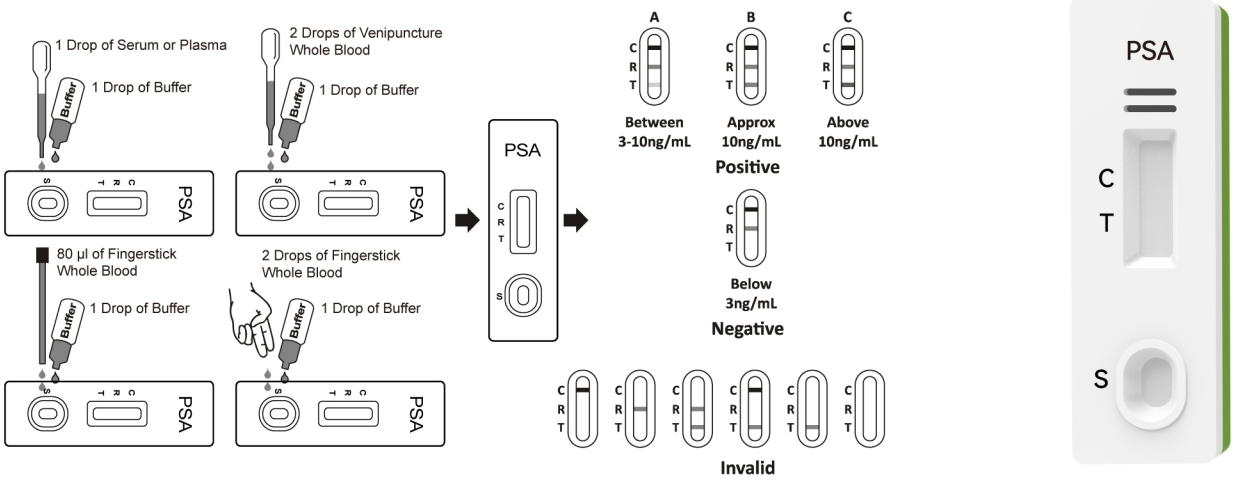

Ordering Information

Cat. No.: SIC-RDT-PSA-202080
Product: PSA Rapid Test
Specimen: WB/S/P
Format: Cassette
Kit Size: 25 T

Product Advantages

- ✓ Fast results in **5** minutes
- ✓ Easy visually interpretation
- ✓ High Accuracy

Convenient Procedure

Sicuro Bioengineering Ltd.
Address: 19 East West Road, Port Harcourt - Nigeria
Email: info@sicurobio.com
